Eco-friendly Initiatives

Rosewood Mayakoba is a leader in sustainable tourism, implementing incredibly extensive, eco-friendly conservation practices property wide. We abide by the highest of eco-standards, offering indulgence with awareness, and have been awarded the Rainforest Alliance Certification. From energy and water conservation to responsible, sustainable culinary practices, Rosewood Mayakoba is passionate about green hospitality. It's part of our DNA.

We are proud of our environmentally responsible culinary practices in the kitchen and beyond as a certified **Seafood Watch** partner for our sustainable seafood purchasing practices. Chef Juan Pablo Loza is passionate about clean culinary practices, focuses on healthy, whole foods of high quality and taste, and was responsible for debuting the resort's organic garden, featuring an abundance of fruits, vegetables, and herbs, served to quests in each of our restaurants and bars.

The resort also has a multi-faceted "Green Operations" program for trash, water and energy practices far surpassing the basics of recycling - from our elimination of Styrofoam and complete reduction of single use plastic. We utilize water filters across the resort - providing guests with recycled glass bottles in place of plastic – and our bathroom amenities are provided to our guests in large, refillable vessels. All of our water used at Rosewood Mayakoba is obtained from a natural well and is then filtered through a practice called inverse osmosis.

Tortuga Cocktail

Available throughout the year, guests at Rosewood Mayakoba can toast to sea turtle conservation with the Akumal Mezcalita Cocktail offered across the property's captivating dining venues including Casa del Lago, Punta Bonita, Agave Azul, and on the beach. Mixed with gin, Martini Bianco, lemongrass, raspberry syrup and lemon, 20% of the proceeds benefit the work of Centro **Ecológico Akumal**, a not-for-profit organization dedicated to sustainability-related issues including the conservation of nesting sea turtles and hatchlings in Quintana Roo.
